Description			
<p>I have an idea that would be useful to all users. It would be helpful to have a wiki article that offered help with the search feature. Such as,</p> <ul style="list-style-type: none">• searching for a specific word or substring typing up gives searches for upper, ups, etc.• searching for two words with or without a space in between 120 gev vs 120gev <p>Those are just a couple off the top.</p>
